

# Sustainability Analysis

**COMPREHENSIVE ASSESSMENT OF THE ENVIRONMENTAL, SOCIAL AND ECONOMIC IMPACT**

## KEY WORDS

LIFE CYCLE ASSESSMENT,  
CARBON FOOTPRINT,  
ENVIRONMENTAL IMPACT

## DESCRIPTION

This capability offers a holistic sustainability assessment of products, services, or organizations, covering its three dimensions: environmental, social, and economic. This capability allows organizations to identify their main impacts, manage risks, find improvement opportunities, comply with regulations, and communicate their performance to stakeholders (customers, investors, community) in a rigorous and standardized manner.

## APPLICATIONS

- Carbon footprint of a product or company
- Comparative analysis of environmental impact between different alternatives
- Identification of critical points
- Support for environmental certifications
- Social impact assessment in the supply chain
