

Manufacturing Process

PRECISION MACHINING

KEY WORDS

FABRICATION AND
MANUFACTURING
PROCESSES,

PRECISION
MACHINING,

ADVANCED
MANUFACTURING

DESCRIPTION

The LRGP (Laboratoire Réactions et Génie des Procédés) has extensive capabilities in mechanical design and manufacturing, including mechanical conception, static and dynamic analysis, as well as conventional and CNC turning and milling. It also has computer-aided manufacturing (CAM) capabilities and assembly techniques such as TIG welding and oxyacetylene brazing.

APPLICATIONS

Virgin Polymers
