

# Environmental Consulting and Sustainability

CONSULTING IN SUSTAINABILITY, CIRCULAR ECONOMY AND ENVIRONMENTAL MANAGEMENT

## KEY WORDS

SUSTAINABILITY,  
CIRCULAR ECONOMY,  
WASTE  
MANAGEMENT

## DESCRIPTION

The Curauma Biotechnology Center (NBC) at PUCV supports companies and institutions in adopting best practices and sustainable development strategies. It offers services such as carbon footprint assessment and management, energy efficiency, sustainability plan design, and support in implementing circular economy models. The NBC applies environmental assessment and resource efficiency methodologies to strengthen sustainable management in production and service processes. The NBC has staff trained in the use of carbon and water footprint calculation tools; sustainability assessment and planning methodologies; environmental performance and circularity indicators; and equipment for process and energy efficiency monitoring.

## APPLICATIONS

- Assessment and management of environmental footprints.
- Implementation of sustainability plans and strategies.
- Support in environmental certifications and clean production.
- Strengthening capacities in environmental management and waste treatment.
