

# Technological Development of Instrumentation

## SUPPORT IN INSTRUMENTATION DESIGN

### KEY WORDS

MEASUREMENT,  
INSTRUMENTS,  
SENSORS

### DESCRIPTION

Universidad Central (UC) has capabilities geared toward developing customized instrumentation tools for injection equipment, plastics processing equipment, and other applications. In cases where sensing of variables commonly used in processes is required, proposals are developed to meet these needs, followed by performance analysis to define the specific instrumentation and analysis of the data obtained in its application.

### APPLICATIONS

- Producers of post-consumer rigid and flexible containers, packaging
- Plastic material recyclers
