UNIVERSIDAD CENTRAL

CAPABILITY

Equipment Support, Maintenance and Use

TRAINING AND TECHNICAL ADVISORY TO IMPROVE EQUIPMENT USE AND USEFUL LIFE

KEY WORDS

EQUIPMENT,
PRODUCTION,
OPTIMIZATION

DESCRIPTION

Central University (CU) has experience in training and technical support in the use, operation, and maintenance of plastic production machinery (shredders, boilers, injection molding machines, blow molding machines, among others). Preventive maintenance plans are designed considering electrical, mechanical, electronic, and software components. This extends the lifespan of the equipment, reduces failures, prevents delays, and lowers costs associated with repairs or spare parts. Ideal for Small and Medium-sized Enterprises (SMEs) seeking to improve the efficiency and sustainability of their processes.

APPLICATIONS

- Extended producer responsibility (EPR)
- Producers of containers, packaging and plastic-based items
