DESCRIPTION

The Public Policy Observatory, linked to the Economics program, has capabilities related to the analysis of environmental regulations and circular economy policies that impact the productive sector. This type of study allows companies and projects to align their practices with current regulations, design waste management systems, diagnose and improve internal and external environmental plans, and strengthen their capabilities through training in corporate sustainability. It is ideal for those seeking to integrate circular criteria into their processes and business models.

APPLICATIONS

- Producers of post-consumer rigid and flexible packaging
- Plastic material recyclers
