

R&D&I Project Development

DESIGNING PROJECTS FOR INNOVATION AND SUSTAINABILITY

KEY WORDS

PROJECT
FORMULATION,
R&D&I,
FINANCING

DESCRIPTION

This service focuses on the technical formulation of research, development, and innovation (R&D&I) projects, with an emphasis on sustainability, the circular economy, and applied technological solutions. The service includes defining the problem, objectives, methodology, work plan, expected results, and indicators, as well as the technical preparation of proposals for public and private, national and international funding. It emphasizes ensuring technical coherence, feasibility, and alignment with the evaluation criteria of funding instruments.

AVAILABLE TECHNIQUES AND/OR EQUIPMENT

- Logical framework design
- Definition of technical and environmental indicators
- Technical adjustment of projects to meet public and private funding requirements
- Experience in structuring collaborative academia-business proposals

APPLICATIONS

- Application for innovation and sustainability funds
- Circular economy project design
- Formulation of initiatives for the valorization of waste and plastic materials
- Collaborative projects between companies, universities and the public sector
- Proposals for scaling and technological validation
