

Municipal Climate Action Plans (PACCC)

DEVELOPMENT OF LOCAL CLIMATE CHANGE ADAPTATION AND MITIGATION PLANS

KEY WORDS

CLIMATE CHANGE,
CLIMATE STRATEGY,
LOCAL POLICIES

DESCRIPTION

This consultancy service includes the collection of local socio-environmental information, the diagnosis of vulnerabilities, the definition of strategic lines, the co-construction of measures, and territorial planning with a sustainability and climate justice approach. The PUCV Climate Action Center offers municipalities and governments the development of Communal Action Plans for Climate Change (PACCC), following a participatory, multisectoral methodology aligned with Chile's Long-Term Climate Strategy.

AVAILABLE TECHNIQUES AND/OR EQUIPMENT

- Application of participatory methodologies with a territorial focus
- Use of Geographic Information Systems (GIS)
- Climate diagnostic tools and local vulnerability
- Facilitation of citizen workshops
- Models of local governance and multi-scale articulation

APPLICATIONS

- Development of community climate plans
- Technical assistance for applications for environmental funding
- Strengthening municipal capacities
- Participatory environmental education
- Design of territorial resilience strategies
