

Organizational Management Systems

DESIGN AND IMPLEMENTATION OF ORGANIZATIONAL MANAGEMENT SYSTEMS

KEY WORDS

SYSTEMS,
MANAGEMENT,
EFFICIENCY

DESCRIPTION

We design and support the implementation of management systems, ensuring the achievement of results through a process of continuous improvement. The working phases include: Operational Planning (translating the strategic plan into operational actions), Execution and Monitoring (detecting and correcting deviations in execution), Performance Management Reporting, and Performance Evaluation.

AVAILABLE TECHNIQUES AND/OR EQUIPMENT

- Operational planning techniques
- Process mapping
- Design of management flowcharts
- Design of flowcharts for production, administrative, logistics and commercial processes
- Analysis of times, rework, discards, etc.
- Participatory process techniques and working groups for process redesign
- Problem-solving techniques through work groups
- Design and implementation of improvement suggestion systems
- Analysis, design and implementation of critical control points
- Implementation of a review meeting system (managerial and operational levels)
- Processing of historical information
- Determination of standards
- Implementation of problem analysis and prioritization techniques (Pareto, ABC analysis)
- Analysis and design of stock systems
- Dashboard design

APPLICATIONS

- Continuous improvement processes
- Procedure manual, instructions and records
- Input for addressing Quality Certification processes
