

Diploma in Measurement, Reporting and Verification of GHG Emissions and Reductions

KEY WORDS

GHG,
MRV,
EMISSIONS

MAIN CONTENTS

This diploma program is designed to train specialists in MRV (Methodological, Verifiable, and Reference) for GHG emissions and reductions for voluntary certification. It covers climate change concepts, international methodologies, emissions quantification, reporting, verification, current regulations, and practical case studies applied to various productive sectors.

COURSE DYNAMICS

The diploma program is delivered through synchronous online classes, activities on an e-learning platform, applied exercises, collaborative work, and module-based assessments. It includes a review of regulations, analysis of emission factors, and the use of technical guides and manuals.

LANGUAGE

Spanish

EVALUATION METHODOLOGY

Assessment through online tests, module-based assignments, and a final integrative exam. Includes written evaluations with objective and open questions, as well as applied exercises. Grading uses a 1.0-7.0 scale with a minimum passing score of 4.0.
