

Diploma in Climate Action

KEY WORDS

CLIMATE ACTION,
SUSTAINABILITY,
CIRCULAR ECONOMY

MAIN CONTENTS

Tools and strategies for climate action at territorial level, with emphasis on governance, sustainability, circular economy and mitigation. Includes practical cases and active learning methodologies applied to real-world contexts.

COURSE DYNAMICS

The program combines theoretical classes with applied work, national case studies, design of real strategies and participation of public and private actors. It uses participatory methodologies with a focus on active and collaborative learning.

LANGUAGE

Spanish

EVALUATION METHODOLOGY

Evaluation based on development of territorial strategies, active participation, and final project delivery.
