

Circular Economy Diploma

KEY WORDS

CIRCULAR ECONOMY,
INNOVATION,
CIRCULAR BUSINESS
MODELS

MAIN CONTENTS

The Circular Economy Diploma Program covers the fundamentals and principles of the circular economy from a systems-thinking perspective, addressing climate emergency challenges and sustainable development transitions. It includes innovation and productive diversification, tools and methodologies for implementing circular economy practices in productive systems, design and assessment of circular business models, and the concept of circular territories, encompassing public policy, local governance, industrial symbiosis, and multi-stakeholder collaboration, concluding with the development of an applied circular economy project.

COURSE DYNAMICS

Online program combining synchronous and asynchronous activities (180 total hours), including lectures, individual tasks and collaborative work; each module includes a synchronous coordination session plus a specialized talk/lecture.

LANGUAGE

Spanish

EVALUATION METHODOLOGY

Collaborative work
