

Circular Economy

KEY WORDS

CIRCULAR ECONOMY,
ZERO WASTE,
WASTE
MANAGEMENT

MAIN CONTENTS

The course covers circular economy as the optimization of material resources under sustainability criteria, including the “zero waste” approach or reintegration of materials into productive systems, considering technological and financial challenges and broader industrial/social reorganization; it also reviews real implementation cases (OECD), using Basque Country SMEs (Euskadi) as reference, focusing on methods for plan implementation, execution, and results reporting in waste management

COURSE DYNAMICS

E-learning delivery, with instruction based on real case studies and methodological explanations (implementation, execution, and results), scheduled in the evening.

LANGUAGE

Spanish

EVALUATION METHODOLOGY

Written, oral and/or practical assessments
